Discord User Guide

Discord is a free text and voice communication application accessed through a computer or phone application store. The club uses it to enable voice chatting while doing virtual rides in Zwift.

After downloading, you will need to create an account and username.

To access the "Fredericksburg Cyclists Club" channel directly:

- Tap the "+" button on the left
- "join a server" at the bottom
- Type in the invite link provided (DPC8BchvaV) or ask the ride leader to send the direct link via text message

Once in the channel you will have the options of using the text chat or "join" the voice chat.

Note: Test it out before you're ride begins. Put a message in the text chat and say Hello! The use of headphones is recommended to cut down on back ground noise.

Server: Zwift insider
